UPDATED VISUAL SET

Large-scale event, PUBG/PMGC final, corporate, protocol and technical operation visuals.

ABOUT SAHNEVA

A technical production partner for event fields

Sahneva plans and delivers the visible stage experience together with the backstage infrastructure. Our work covers stage systems, LED screens, sound, lighting, truss structures, podiums, tents and technical field operation.

We focus on the full event field: equipment selection, installation timeline, crew planning, signal and power routing, control desk setup, rehearsal support and event-day technical coordination.

Field discovery

Venue, access, audience size and technical needs are reviewed.

Production scope

Stage, LED, sound, light and truss are planned together.

Installation

Crew, logistics and setup timing are coordinated.

Show operation

Control desk, backstage and event-day technical support.

FEATURED PROJECT TYPE

PUBG / PMGC Grand Final Production

High-impact esports finals require large LED surfaces, precise content timing, show lighting, player areas, control systems and a fast technical crew.

This version uses final-stage visuals instead of small event photos, so the portfolio communicates scale, audience impact and professional esports production capability.

Selected high-impact visual references

Large event visuals are prioritized: main stages, esports finals, LED-heavy productions, protocol conferences and brand experiences.

Open-Air Concert Stage

Massive outdoor stage, LED surfaces, lighting and audience-scale production.

PUBG / PMGC Final

Esports final stage, large LED screen, lighting and arena atmosphere.

Corporate Gala Stage

Indoor LED wall, stage lighting, live performance and gala seating.

Protocol Conference

Conference backwall, LED side screens and press/audience setup.

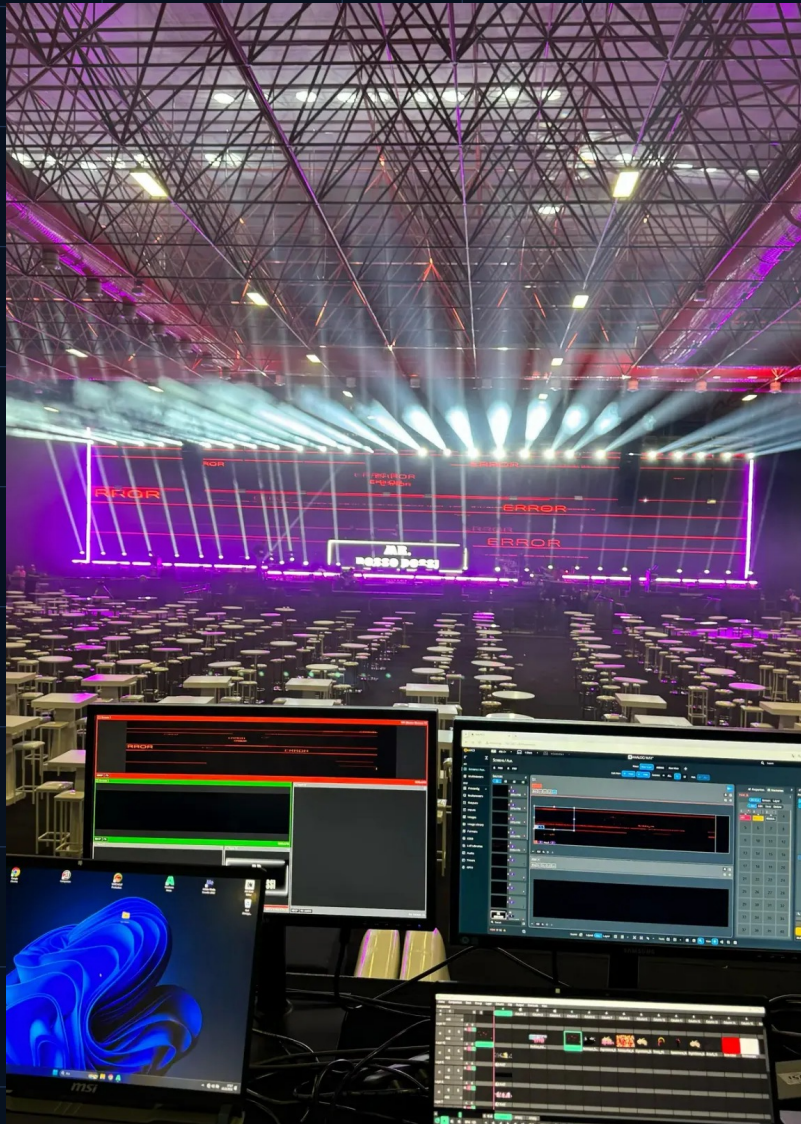

Stadium Lighting Setup

Large venue lighting, truss and field-scale show production.

Brand Launch LED Experience

LED product stands, brand visibility and indoor experience area.

TECHNICAL OPERATION

From control desk to main stage

Backstage control, signal flow, LED operation, lighting cues, truss systems, sound infrastructure and field logistics

CORPORATE EVENTS

Protocol, conference and brand stages

Clean visuals, controlled sound, clear speaker visibility, reliable LED content and a disciplined technical crew.

Conference & Protocol

LED backwall, side screens and audience-facing presentation setup.

Corporate Gala Stage

Large LED screen, stage lighting and premium corporate event view.

Brand Launch LED Stand

Immersive LED stands and brand activation experience areas.

SERVICES

Integrated production for complex event fields

Stage & Podium

Modular stage systems, podiums, stairs and stage flooring.

LED Screens

Indoor/outdoor LED walls, video walls and screen support.

Sound Systems

Line array systems, mixers, microphones and monitoring.

Lighting

Moving heads, beam fixtures, wash lights and show control.

Truss & Roof

Truss structures, support systems and field setup planning.

Event Operation

Crew, logistics, rehearsal support and day-of-event control.

SAHNEVA

Let's plan your event field.

Share the event date, city, venue, audience size, stage expectation, LED screen need and technical scope. Sahneva can return with a clear proposal for equipment, crew, logistics and operation.
